The Academy of Music

THE OATH OF HIPPOCRATES

I do solemnly swear by that which I hold most sacred:

That I will be loyal to the profession of medicine,
just to its members, and generous to its institutions;

That I will lead my life and practice my art in
uprightness and honor;

That I will give respect and gratitude to those who
have taught me this art;

That into whatsoever house I shall enter, it shall be
for the good of the sick to the utmost of my power,
I holding myself aloof from wrong, from corruption,
from the tempting of others to vice;

That I will exercise my art for the best care of my
patients,
and I will give no drug, perform no operation for
a criminal purpose, even if solicited far less
suggest it;

That whatsoever I shall see or hear of the lives of
my patients which is not fitting to be spoken,
I will keep inviolably secret.

These things I do promise upon my honor.

CANDIDATES FOR THE DEGREE OF DOCTOR OF PHILOSOPHY

- TERESA FERNANDES-ALNEMRI (Genetics) Bombay, India
B.S., St. Xavier's College; M.S., Temple University
Thesis Title: "Identification of a Complex Tandem Repeat Family in the Human Genome and Characterization of One Family Member, a Novel Gene Expressed in Hematopoietic Lineages"
Thesis Advisor: K. Huebner, Ph.D.
- MICHAEL REX BLACKBURN (Anatomy and Developmental Biology) Bristol, TN
B.S., King College
Thesis Title: "Characterization of an Adenosine Signalling Mechanism in the Early Postimplantation Mouse Uterus"
Thesis Advisor: T.B. Knudsen, Ph.D.
- *SULAGNA CHAKRABORTY (Biochemistry and Molecular Biology) Poolesville, MD
B.A., The Johns Hopkins University
Thesis Title: "Mutations in the Lysosomal β -Galactosidase Gene that Cause the Adult Form of GM1 Gangliosidosis"
Thesis Advisor: D.A. Wenger, Ph.D.
- *CYNTHIA CHENG (Molecular Pharmacology and Structural Biology) Allentown, PA
B.S., The Pennsylvania State University
Thesis Title: "Effects of Acetylsalicylic Acid on Fibrin Clot Cross-Linking, Lysis, and Structure: *in Vivo* and *in Vitro* Studies"
Thesis Advisor: T.D. Bjornsson, M.D., Ph.D.
- KELLY LYN DAVENPECK (Physiology) Philadelphia, PA
B.S., Russell Sage College
Thesis Title: "The Role of P-Selectin and Nitric Oxide in Leukocyte-Endothelial Interaction in the Rat Mesenteric Microcirculation"
Thesis Advisor: A.M. Lefer, Ph.D.
- XIANG GAO (Anatomy and Developmental Biology) Nanjing, P.R.C.
B.S., Nanjing University; M.S., Nanjing University
Thesis Title: "Apoptosis in Early Mouse Embryos as a Determinant of Abnormal Development"
Thesis Advisor: T.B. Knudsen, Ph.D.
- *AMY ELIZABETH GEDDIS (Biochemistry and Molecular Biology) Pittsburgh, PA
B.S., Chatham College
Thesis Title: "The Development of a Recombinant System for the Production of Normal and Substituted Pro α 1 (I) Collagen. HT1080 Cells that have Been Stably Transfected with COL1A1 Secrete Homotrimeric Collagen that is Post-Translationally Modified and Thermostable"
Thesis Advisor: D.J. Prockop, M.D., Ph.D.
- YANSONG GU (Genetics) Shanghai, P.R.C.
B.S., East China University of Chemical Technology
Thesis Title: "Molecular Genetics of Human Acute Leukemia with Chromosome Translocation t(4;11)(q21;q23)"
Thesis Advisor: C.M. Croce, M.D.
- GUANGHUI KONG (Molecular Pharmacology and Structural Biology) Hangzhou, P.R.C.
B.M., Harbin Medical University; M.M., Zhejiang Medical University
Thesis Title: "Structural and Functional Characterization of β -Adrenergic Receptor Kinase (BARK)"
Thesis Advisor: J.L. Benovic, Ph.D.
- *PETER SHEN-SU LIAO (Molecular Pharmacology and Structural Biology) Glen Arm, MD
B.S., The Pennsylvania State University
Thesis Title: "Extracellular Matrix Proteins as Stimulators of Tissue-Type Plasminogen Activator Activity"
Thesis Advisor: T.D. Bjornsson, M.D., Ph.D.
- REBECCA ANN LIDDELL (Developmental Biology/Teratology) Newfane, NY
B.A., State University of New York, Potsdam, NY
Thesis Title: "The Analysis of Isoactin Gene Expression During Normal and Abnormal Gastrointestinal Smooth Muscle Development"
Thesis Advisor: K.M. McHugh, Ph.D.
- DAVID HUA LIN (Genetics) Shanghai, P.R.C.
M.D., Shanghai Medical College
Thesis Title: "Cellular Genes Modulated by p53 Protein"
Thesis Advisor: W.E. Mercer, Ph.D.

*Also receiving a Doctor of Medicine degree from Jefferson Medical College.

- JAMES MICHAEL McDONNELL (Immunology) Easton, MA
B.S., University of Massachusetts
Thesis Title: "The Role of the CDR3-like Region of CD4 in T Cell Activation"
Thesis Advisor: B.A. Jameson, Ph.D.
- REEMA MEWAR (Biochemistry and Molecular Biology) Cincinnati, OH
B.S., Kishinchand Chellaram College; M.S., Institute of Science, Bombay
Thesis Title: "Analysis of Patients Displaying Clinical Findings Associated with Trisomy 18"
Thesis Advisor: J.M. Overhauser, Ph.D.
- JULIE ANNE NAPIERALSKI (Developmental Biology/Teratology) Shavertown, PA
B.S., King's College
Thesis Title: "Characterization and Developmental Analysis of the Cerebellum of the Meander Tail Mutant Mouse"
Thesis Advisor: L.M. Eisenman, Ph.D.
- MICHELE ANN PARADIES (Developmental Biology/Teratology) Ardmore, PA
B.S., Wilkes College
Thesis Title: "The Embryonic Development and Organization of the Olivocerebellar and Nucleo-Olivary Projection Systems in the Mouse"
Thesis Advisor: L.M. Eisenman, Ph.D.
- JOHN GAETANO PASTORINO (Pathology and Cell Biology) Philadelphia, PA
B.S., Temple University
Thesis Title: "The Role of Mitochondrial Dysfunction in Hypoxic Cell Killing"
Thesis Advisor: J.L. Farber, Ph.D.
- NEENA PHILIPS (Biochemistry and Molecular Biology) Bihar, India
B.S., Women's Christian College; M.A., Mount Holyoke College
Thesis Title: "Mechanisms Responsible for Increased Collagen Gene Expression in Tight-skin (TSK) Mice Myocardial Fibroblasts"
Thesis Advisor: S.A. Jimenez, M.D.
- IRENE T. PLEASURE (Molecular Pharmacology and Structural Biology) Philadelphia, PA
B.A., University of Pennsylvania
Thesis Title: "Clathrin Interactions with HSC70- and Valosin-Containing Protein"
Thesis Advisor: J.H. Keen, Ph.D.
- ELLEN JANE PURPUS (Pathology and Cell Biology) Cincinnati, OH
B.S., Ball State University
Thesis Title: "Differentiation-Defective Murine Embryonal Carcinoma Cells: Characterization of Retinoic Acid-Induced Gene Expression and Rescue of Phenotype by DNA Transfection"
Thesis Advisor: P.A. McCue, M.D.
- DENNIS J. ROZANSKI, JR. (Pathology and Cell Biology) Boulder, CO
B.S., Philadelphia College of Pharmacy & Science
Thesis Title: "Effects of Ethanol on Excitation-Contraction Coupling in Single Cardiomyocytes"
Thesis Advisor: A.P. Thomas, Ph.D.
- *KIMBERLY KLIMEK RUHL (Biochemistry and Molecular Biology) Newark, DE
B.A., Dartmouth College
Thesis Title: "Phorbol Esters Suppress Ornithine Decarboxylase Activity and Alter ODC Subcellular Localization Concomitant with Disruption of Actin Cytoskeleton in Human Epidermal Cells"
Thesis Advisor: N.J. Hickok, Ph.D.
- *MARTIN ROBERT SIEGFRIED (Physiology) Hilltown, PA
B.S., The Pennsylvania State University
Thesis Title: "Myocardial and Endothelial Protective Effects of Nitric Oxide Donors in Feline Myocardial Ischemia and Reperfusion"
Thesis Advisor: A.M. Lefer, Ph.D.
- RAJ KAMAL SINHA (Biochemistry and Molecular Biology) Coraopolis, PA
B.S., The Pennsylvania State University; M.D., Jefferson Medical College
Thesis Title: "Adhesion of Human Bone Cells to Orthopaedic Implant Materials"
Thesis Advisor: R.S. Tuan, Ph.D.
- SHAU-CHING WEN (Genetics) Taipei, Taiwan
B.S., Fu-Zen Catholic University
Thesis Title: "The Study of the Regulation of Human CDC2 Gene"
Thesis Advisor: B. Calabretta, M.D., Ph.D.
- MAYME WONG (Developmental Biology/Teratology) Willowdale, Ontario, Canada
B.S., University of Toronto; M.S., University of Toronto
Thesis Title: "Regulation of Cellular Differentiation in the Developing Chick Embryonic Calvarium"
Thesis Advisor: R.S. Tuan, Ph.D.

Candidates for the combined B.S./M.S. Program in Physical Therapy have successfully completed all formal course work. They are also required to take two 8-week clinical internships, which will not be completed until August 26, 1994. They will receive a certificate of accomplishment at this Commencement, and upon completion of their internship requirements, the diplomas for the bachelor of science and master of science degrees.

It is the policy of the College of Graduate Studies not to award honors to graduates with the doctor of philosophy or master of science degree.

As final action cannot be taken before the program goes to press, Thomas Jefferson University reserves the right to add or withdraw names from the list of candidates for degrees.

GAMBRILL BRETT MURRAY

DOCTOR OF SCIENCE — JEROME P. KASSIRER

Dr. Jerome P. Kassirer, the current Editor-in-Chief of the *New England Journal of Medicine*, is highly regarded for his achievements as a clinician, teacher, and medical scholar.

Dr. Kassirer received his M.D. degree Magna Cum Laude in 1957 from the University of Buffalo. After his residency at Buffalo General Hospital and training in nephrology at New England Medical Center in Boston, he was appointed Assistant Professor of Medicine at Tufts University, where he is still on the faculty and where, in 1974, he became a Professor of Medicine. From 1971 to 1991 he was Associate Physician-in-Chief of the New England Medical Center and Vice Chairman of the Department of Medicine at Tufts University School of Medicine.

Dr. Kassirer has published numerous original research and clinical studies, textbook chapters, and books on nephrology, medical decision making, and the diagnostic process. He has served on the editorial boards of several journals, including *The New England Journal of Medicine*, *Hypertension*, *Medical Decision Making*, and *Nephrology Forum* in the journal *Kidney International*. From 1985 to 1991 he was co-editor of *Clinical Problem Solving in Hospital Practice*.

Dr. Kassirer has been a visiting professor at many medical centers and has given numerous named lectureships. He was elected to AOA as a student and was named the AOA Distinguished Clinical Teacher of the year in 1989. He is a Master of the American College of Physicians, was named Distinguished Alumnus of 1991 by the School of Medicine and Biomedical Sciences at the University of Buffalo, and in the same year received the Distinguished Faculty award from Tufts University School of Medicine. He has honorary degrees from the University of Massachusetts and l'Universite Rene Descartes in Paris.

In addition, Dr. Kassirer served on the American College of Physicians' Board of Governors and Board of Regents, and chaired the National Library of Medicine's Board of Scientific Counselors. He is a Director of the American Board of Internal Medicine and a member of the Institute of Medicine of the National Academy of Sciences, the American Society of Nephrology, and a charter member of the Society for Clinical Decision Making.

Dr. Kassirer has written editorials on many topics since coming to *The New England Journal of Medicine* in 1991, including scientific misconduct, conflict of interest, diagnostic reasoning, electronic publishing, clinical trials, quality of medical care, medical education, and the hazards of handguns.

DOCTOR OF SCIENCE — TAKASHI SUGIMURA

Dr. Takashi Sugimura is one of Japan's most distinguished and honored scientists. He currently serves as President Emeritus of the National Cancer Center of Japan, where he was President from 1984 to 1991. His career at the Center began in 1962 with his appointment as the chief of the biochemistry division. Since then he has been instrumental in making it one of the foremost cancer research sites in the world. In addition, he has recently assumed the role of Advisor to the Ministry of Health and Welfare in Japan.

Dr. Sugimura received his M.D. degree from Tokyo University in 1949 and his Doctor of Medical Science degree, also from Tokyo University, in 1957.

Dr. Sugimura's international reputation is based on many discoveries and achievements in cancer research, particularly concerning the mechanism and prevention of cancer. Space permits mentioning only a few of these achievements. In 1977 he and another scientist discovered the carcinogenicity of 4-nitroquinoline 1-oxide. Dr. Sugimura was the first scientist to relate bacterial mutagenicity to carcinogenicity, and, along with his co-workers, he demonstrated the parallel action of mutagens and carcinogens and observed the carcinogenic and mutagenic action of nitrofurans. In this area a notable discovery was the potent carcinogenic action of furofuramide, a preservative used for many years in some Japanese foods. He has also done extensive pioneering research that uncovered a series of multisite carcinogenic heterocyclic amines produced through cooking meats and fish. This is currently a very active area of cancer research. Dr. Sugimura has also added greatly to the understanding of the concept of gene regulation in cancer through his finding of the switching on and off of various genes encoding certain isoenzymes. These findings have contributed to the current emphasis on multiple genetic steps in tumor development.

In addition to his substantial accomplishments as a researcher, Dr. Sugimura is also highly regarded by his colleagues for his leadership and organizational skills. He has been commended both for his open mindedness and his decisiveness, and he has used these skills in his many leadership roles. He is Editor-in-Chief of the *Japanese Journal of Cancer Research* and the *Japanese Journal of Clinical Oncology*. As Chairman of the Scientific Advisory Board of the Princess Takamatsu Cancer Research Foundation, he plays an important role in the Foundation's programs. He promoted excellence at the National Cancer Center through the recruitment of outstanding researchers and clinicians and fostered a spirit of unity among the research, clinical, and administrative staffs. Through his diligent efforts he was instrumental in the construction of a 350-bed hospital near Tokyo and the start of construction of another hospital on the main campus of the National Cancer Center.

His activity on the international level includes service as a consultant and counselor to numerous foundations, societies, and institutions. Dr. Sugimura also played a role in the establishment in 1989 of a series of joint conferences between the American Association for Cancer Research (AACR) and the Japanese Cancer Association.

Dr. Sugimura has been honored both within Japan and internationally. In addition to membership in the Japan Academy, he is a foreign associate member in the United States National Academy of Sciences, a foreign member in the Royal Swedish Academy of Sciences, the Royal Netherlands Academy of Arts and Sciences, and an honorary member in the AACR, the American Society of Biochemistry and Molecular Biology, and the Korean Cancer Association. He is the recipient of numerous international awards including the Charles S. Mott Prize of the General Motors Cancer Research Foundation (1991), The Ernst W. Bertner Memorial Award (1981), The Tomizo Yoshida Prize of the Japan Cancer Society (1992), and the Outstanding Work Award of the United States Environmental Mutagen Society (1978).

THE UNIVERSITY MACE

The Thomas Jefferson University mace, carried for the first time in the 1986 commencement ceremonies by the grand marshal, was designed and cast by Howard Serlick, member of the Guild of Mastercraftsmen, Winterthur Scholar, and Chief Conservator (Gilding) of the Historical Society of Pennsylvania. It was crafted by silversmith Eugene Zweigle and woodturner Michael Copeland.

The four-foot-long, fourteen-pound mace is made of ebony highlighted with lapis lazuli to reflect Jefferson's colors (black and blue). It features a miniature of Henry Mitchell's sculpture, The Winged Ox, symbol of Saint Luke the Physician, the original of which stands beside the Scott Building on Walnut Street. The miniature was cast in silver by Mister Zweigle, who also fabricated the University seal, the profile of Thomas Jefferson, mounted at the base of the staff. The J. E. Caldwell Company coordinated the project.

Mister Mitchell's original statue of The Winged Ox, adopted by the University in 1976 as its symbol of clinical excellence, is mounted on a column containing the names of fifty medical scientists who have most advanced the art of healing. It also reflects the historical evolution of Thomas Jefferson University from its beginnings as Jefferson Medical College in 1824 to its current status as an academic health center comprising Jefferson Medical College, the College of Allied Health Sciences, the College of Graduate Studies, and the Thomas Jefferson University Hospital.

The mace, a grand emblem of the University's heritage, is carried at the head of all formal academic processions.

THE ACADEMIC COSTUME

The wearing of academic dress dates back to the early days of the older universities in the world. In the American Council on Education's book entitled *American Universities and Colleges*, it is suggested that "gowns may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods seem to have served to cover the tonsured head . . ."

Throughout the years European universities have continued to show great diversity in their academic dress. American universities, on the other hand, when they decided to adopt academic dress in 1895, immediately established a code of regulations which today is followed by almost all American institutions. The establishment of this code has made it possible to distinguish the associates, bachelors, masters, and doctors and at the same time recognize the university which has given them the degree. Revisions to the code have occurred from time to time.

The gowns for associates in arts and bachelors have pointed sleeves and are worn closed. The master's gown has oblong sleeves, open at the wrist. The rear part of its oblong shape is square cut and the front part has an arc cutaway, and is worn open or closed. The doctor's gown has bell-shaped sleeves. It is worn open or closed. Cotton poplin or similar material is used for the associate's, bachelor's and master's degrees, and rayon- or silk-ribbed material is used for the doctor's degree. The majority of gowns are black, but a number of institutions have adopted other colors to identify special programs or groups within the institution.

The hoods vary in length: 48 inches for the doctor's degree, 42 inches for the master's, and 36 inches for the bachelor's and associate's. All hoods are lined in silk in the academic color or colors of the institution conferring the degree. If the institution has more than one color, the colors are shown in divisions using chevrons. The binding or edge of the doctor's, master's, and bachelor's hoods are usually made of velvet in the color designating the subject in which the degree was granted. The associate of art's hood has no velvet border. The outside is black.

Black mortarboards are most commonly worn; six-sided tams of various colors may be used.

Some of the colors in the bindings of the hoods are:

white	arts and letters	green	medicine
tan	business	apricot	nursing
lilac	dentistry	dark blue	philosophy
light blue	education	salmon pink	public health
purple	law	golden yellow	science

The colors of the linings of the hoods for some Philadelphia academic health institutions are:

black and blue	Thomas Jefferson University	silver gray and scarlet	The Medical College of
red and blue	University of Pennsylvania		Pennsylvania
blue and gold	Hahnemann University	white and cherry	Temple University

THE JEFFERSON PROCESSIONAL

The Jefferson Processional was commissioned by the Alumni Association of Jefferson Medical College and played for the first time on November 15, 1974, at the sesquicentennial celebration of Jefferson Medical College of Thomas Jefferson University. This piece was presented to Thomas Jefferson University by the President of the Alumni Association of Jefferson Medical College, Doctor John J. Gartland. It was composed by Burle Marx.

THE PRESIDENTIAL BADGE OF THOMAS JEFFERSON UNIVERSITY

The president's badge was created for the inauguration of Lewis W. Bluemle, Jr., M.D. as President of Thomas Jefferson University on September 7, 1977. It consists of four official corporate seals of Thomas Jefferson University and the predecessor corporation, The Jefferson Medical College of Philadelphia. These seals were used to mark diplomas, certificates, and other official documents and have been gold-plated to form the presidential badge. When worn by the President they are suspended from a black and blue ribbon, the University colors, united in the form of a circle with each seal comprising a top, bottom, right and left medallion.

The medallion on the President's right is the corporate seal of Thomas Jefferson University today and was created in 1969 when The Jefferson Medical College became Thomas Jefferson University. It carries a contemporary likeness of Thomas Jefferson.

The other three medallions are the various seals that were used in The Jefferson Medical College for many years. The oldest, at the bottom, marked every diploma that was issued by the College from 1839 to 1967. This seal carries a traditional likeness of a young Thomas Jefferson and the founding date of the College as 1826. Prior to 1839, the diploma of The Jefferson Medical College carried the seal of the parent institution, the Jefferson College in Canonsburg, Pennsylvania. The old corporate seal on the left bears the Latin words "Sigillum Jeffersoniani Medicinae Collegii-Philadelphiae" with no date.

The seal at the top was developed in 1967 as a result of research done by the late Edward L. Bauer, Professor Emeritus of Pediatrics, who determined that the founding year of Jefferson Medical College was 1824 rather than 1826. This seal is identical to the present corporate seal except that the words "Thomas Jefferson University" are replaced by "Jefferson Medical College." It was used only for the two years of 1967 to 1969.

The presidential badge is on permanent display in the Scott Memorial Library and is used at all convocations of the University.
